

All energy on earth comes from the sun. The animals and plants of Lagan Valley Regional Park get energy in several ways:

## 1. Producers

A producer is something that can make its own food. Plants are producers because they use sunlight to make food or energy.

Circle which of the pictures below are producers:

## 2. Herbivore

Herbivores are animals that **ONLY** eat plants.

Name 3 kinds of herbivores you would find in a woodland.

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

## 2. Carnivore

Carnivores are animals that **ONLY** eat other animals.

Name 3 carnivores you might find in a river?

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

Guess what an **omnivore** is and give 2 examples?

1. \_\_\_\_\_
2. \_\_\_\_\_

Can you draw this forest food chain in the right order in the box below?

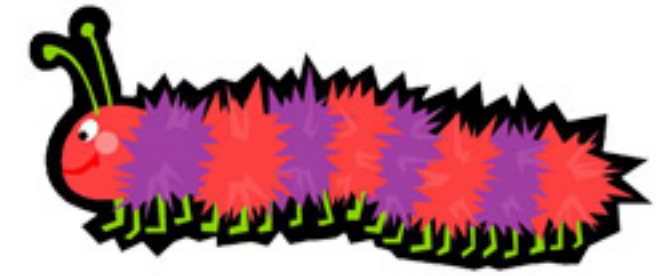

Tree

Bird

Sun

Caterpillar

Can you draw a food chain that you might find in a pond? Include the **sun**, one producer, **one** herbivore and **one** carnivore?
