

How does your garden grow?

The first thing that a gardener needs
Is a hoe for pulling up the weeds.

So here we go, a hoeing-o,
Hoeing the garden to make it grow.

A spade comes next, for digging the earth.
Let's dig and shovel for all we're worth.

So here we go, a digging-o,
Digging the garden to make it grow.

Put down the spade. Pick up a rake
And rake it smooth as a crumbly cake.

So here we go, a raking-o,
Raking the garden to make it grow.

We've raked, we've dug. We've weeded the ground.
It's time to scatter some seeds around.

So here we go, a sowing-o,
Sowing the garden to make it grow.

Those seeds are feeling thirsty, I think,
We'd better give them a nice, long drink.

So here we go, a watering-o,
Watering the garden to make it grow.
